1. NATURE OF OPERATIONS AND GOING CONCERN

Barksdale Resources Corp. ("Barksdale" or the "Company"), incorporated in British Columbia, is a public company listed on the TSX Venture Exchange ("TSXV") and the OTCQX in the United States and trades under the symbol BRO.V and BRKCF respectively. The Company's registered office is Suite 615, 800 West Pender Street, Vancouver, British Columbia, Canada, V6C 2V6.

The Company's principal business activities include the acquisition and exploration of precious and base metal mineral properties in Arizona, USA and Sonora, Mexico. The Company has not yet determined whether its exploration and evaluation assets contain ore reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production. To date, the Company has not earned any revenues and is considered to be in the exploration stage.

These condensed interim consolidated financial statements have been prepared by management on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred ongoing losses. A number of alternatives are being evaluated with the objective of funding ongoing activities and obtaining additional working capital. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due.

The Company has not generated revenues from its operations to date. As at September 30, 2022, the Company has accumulated net losses of \$28,554,271 since inception and has working capital of \$1,499,813. The operations of the Company have primarily been funded by the issuance of common shares and convertible debentures. These condensed interim consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence. The Company will require additional financing for the upcoming fiscal year in order to maintain its operations and exploration activities. These material uncertainties raise substantial doubt on the Company's ability to continue as a going concern.

2. BASIS OF PRESENTATION

a) Statement of Compliance

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards ("IFRS") and International Accounting Standards ("IAS") 34 "Interim Financial Reporting" as issued by the International Accounting Standards Board ("IASB").

This condensed interim financial report does not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual consolidated financial statements of the Company for the years ended March 31, 2022 and 2021.

These condensed interim consolidated financial statements for the three and six months ended September 30, 2022 and 2021 were authorized by the Board of Directors for issuance on November 28, 2022.

(Expressed in Canadian Dollars - Unaudited)

2. BASIS OF PRESENTATION (CONTINUED)

b) Basis of Presentation

These condensed interim consolidated financial statements of the Company have been prepared on an accrual basis and are based on historical costs, modified where applicable. The condensed interim consolidated financial statements are presented in Canadian dollars unless otherwise noted.

c) Basis of Consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, TBJ Resources (US) Inc., Arizona Standard Resources Corp., Arizona Standard (US) Corp., IC Exploration Ltd., IC Exploration (US) Ltd., 1260938 BC Ltd., and Estrella de Cobre, S.A. de C.V. All significant intercompany accounts and transactions between the Company and its subsidiaries have been eliminated upon consolidation.

d) Use of Estimates and Judgements

The preparation of these condensed interim consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the condensed interim consolidated financial statements, and the reported amounts of revenues and expenses for the reporting period. Actual results could differ from management's best estimates as additional information becomes available.

Significant areas requiring the use of management estimates and judgments include:

- (i) The determination of deferred income tax assets or liabilities requires subjective assumptions regarding future income tax rates and the likelihood of utilizing tax carry-forwards. Changes in these assumptions could materially affect the recorded amounts, and therefore do not necessarily provide certainty as to their recorded values.
- (ii) The determination that exploration, evaluation, and related costs incurred which were capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including, geologic and other technical information, a history of conversion of mineral deposits with similar characteristics to its own properties to proven and probable mineral reserves, the quality and capacity of existing infrastructure facilities, evaluation of permitting and environmental issues and local support for the project.
- (iii) Inputs used in the valuation model to determine the fair value of stock options.
- (iv) The application of IFRS 16 requires the Company to make judgments that affect the valuation of the right-of-use assets and the valuation of lease liabilities. These include: determining agreements in scope of IFRS 16, determining the contract term and determining the interest rate used for discounting of future cash flows. The lease term determined by the Company is comprised of the non-cancellable period of lease agreements, periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. The present value of the lease payment is determined using a discount rate representing the rate of a commercial mortgage rate, observed in the period when the lease agreement commences or is modified.

(Expressed in Canadian Dollars - Unaudited)

2. BASIS OF PRESENTATION (CONTINUED)

- d) Use of Estimates and Judgements (continued)
 - (v) In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, customers, economies, and financial markets globally, potentially leading to an economic downturn. It has also disrupted the normal operations of many businesses, including the Company's. This outbreak could decrease spending, adversely affect and harm our business and results of operations. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or results of operations at this time.

3. SIGNIFICANT ACCOUNTING POLICIES

These condensed interim consolidated financial statements have been prepared in accordance with IFRS and reflect management's consideration of the following significant accounting policies:

a) Foreign Currency Transactions

The functional currency of an entity is the currency of the primary economic environment in which the entity operates. The functional currency of the Company and each of its subsidiaries is the Canadian dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21, *The Effects of Changes in Foreign Exchange Rates*. Transactions in currencies other than Canadian dollars are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated at the period end exchange rate while non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in profit or loss.

b) Recent Accounting Pronouncements

A number of amendments to standards and interpretations applicable to the Company are not yet effective for the six months ended September 30, 2022 and have not been applied in preparing these condensed interim consolidated financial statements nor does the Company expect these amendments to have a significant effect on its financial statement.

Sunnyside Project

In August 2017, the Company entered into an arm's length definitive agreement (the "Sunnyside Agreement") with Regal Resources USA, Inc. ("Regal US") to acquire, by way of option (the "Option"), up to 67.5% of the Sunnyside Property located in Santa Cruz County, Arizona.

The Option is exercisable in two stages with the Company entitled to acquire an initial 51% interest in the Sunnyside Property upon making payments totalling \$2,950,000 cash and the issuance of 10,100,000 common shares to Regal US and cumulative expenditures of \$6,000,000 on the property during the first two years of the Option (following receipt of all required governmental permits).

Upon acquiring an initial 51% interest in the Sunnyside Property, the Company will be entitled to increase its interest to 67.5% upon payment of an additional \$550,000 cash and the issuance of 4,900,000 common shares to Regal US and the expenditure of an additional \$6,000,000 on the property within a further two year period.

Total	3,500,000	12,000,000	15,000,000				

^{*} Year 1 shall commence on the date the Company has received all required governmental permits including drilling permits to carry out its initial exploration program on the Sunnyside Property. In November 2017, the Company paid the final option payment of \$254,700 (US\$200,000) to the original optionors on behalf of Regal US and the payment was credited towards the required cash payment of \$1,200,000.

Upon the Company earning either a 51% interest or 67.5% interest in the Sunnyside Property, the Company and Regal US will enter into and participate in a joint venture for the purpose of further exploring and developing the property. The Sunnyside Agreements contain provisions for dilution of a party's working interest for failure to fund joint venture cash calls, subject to automatic conversion of a party's interest into a 5% net proceeds interest (not to exceed 90% of the net amount of the party's contributed capital) if diluted to less than 10%. Barksdale will be the operator of the Sunnyside Property during the term of the Option and, if applicable, the joint venture.

The Sunnyside Agreement further provides that:

- a) during the first two years of the Option, Regal US shall vote all of its Barksdale shares in accordance with the recommendations of the Company's management from time to time, other than matters relating solely to Regal US or the Sunnyside Property and subject to Regal US's right to abstain from voting in its discretion;
- Regal US shall give the Company not less than five (5) days advance notice of any proposed sale of Barksdale shares for so long as Regal US owns 5% or more of the Company's outstanding shares;
- c) until such time as the Company has earned a 51% interest in the Sunnyside Property, the Company will not acquire, directly or indirectly, any common shares of Regal Resources Inc. ("Regal BC") without the prior consent of Regal BC;
- d) the Company has a 15 day right of first refusal to acquire all or any part of Regal US's remaining interest in the Sunnyside Property in the event of a proposed sale or transfer of such interest by Regal US;

^{*} Pursuant to the Regal Transaction (Note 4), the Company offset \$150,000 of transaction costs and \$78,229 proxy costs against its option payment obligations due to Regal BC under the Sunnyside Agreement

Sunnyside Project (Continued)

- e) the Company is subject to an acceleration payment clause in the case of change of control of the Company or a transfer of the interest in the Sunnyside Property to a third party during the Option earn-in period; and
- f) the Sunnyside Agreement is subject to a net smelter return ("NSR") between 1.5% to 3%.

The Company may terminate the Option at any time, in its discretion, subject to satisfying any accrued obligations or liabilities including reclamation requirements, as required.

In October 2020, the Company closed an agreement to acquire historic diamond drill core samples and data in exchange for 25,000 common shares of the Company with a fair value of \$12,750.

In May 2021, the Company entered into a definitive purchase agreement with Regal BC whereby the Company would consolidate a 100% interest in the Sunnyside project (the "Regal Transaction"). Subsequently in July 2021, Regal BC failed to obtain the required number of votes for approval of the Regal Transaction, and as a result, the Regal Transaction was terminated. Pursuant to the definitive purchase agreement, the Company is entitled to offset \$150,000 of transaction costs against its future option payment obligations due to Regal BC under the Sunnyside Agreement. Additionally, the Company will offset double the costs against the Sunnyside Agreement related to Regal BC's hiring of a proxy agent.

Four Metals Project

In April 2018, the Company entered into a definitive option agreement with MinQuest, Ltd. and Allegiant Gold (U.S.) Ltd., a wholly-owned subsidiary of Allegiant Gold Ltd. (together "Allegiant") to acquire a 100% undivided interest in the Four Metals property ("Four Metals") located in Santa Cruz County, Arizona.

In order to exercise the option, the Company must make option payments totaling US\$450,000 (the "Option Payments") to MinQuest Ltd. and Allegiant on a 50/50 basis, in cash and common shares of Barksdale (based on the volume weighted average of the Company's shares for the twenty trading days immediately preceding the date of issue subject to a minimum issue price of \$0.68) over a period of five years as follows:

In June 2021, the Company fulfilled its commitments and acquired a 100% undivided interest in the Guajolote Patented Mining Claim Property.

Canelo and Goat Canyon Property

In March 2021, the Company entered into a purchase and sale agreement to acquire a 100% interest in two separate copper exploration projects, the Canelo and Goat Canyon properties located in Santa Cruz Country, Arizona, from Kennecott Exploration Inc. ("Kennecott").

Consideration for the projects consisted of \$44,310 (US\$35,000) in cash (paid) as well as a 2.0% net NSR that covers both properties. The Company will retain the right to repurchase half of the NSR at any time for a cash payment of US\$10,000,000. In the event that a mine is put into production on either property, a one-time cash payment of US\$3,500,000 will be payable to Kennecott upon reaching commercial production.

In June 2022, the Company dropped certain federal mining claims at Goat Canyon Property that were deemed to have limited geologic potential.

San Javier Project

In September 2020, the Company entered into a definitive option agreement to acquire a 100% interest in the San Javier copper-gold project from Tusk Exploration Ltd. ("Tusk") The San Javier property is located in central Sonora, Mexico.

^{*} Certain title issues exist with respect to three of the twelve mining concessions. Under the original definitive option agreement, Tusk agreed to defer 35% of the Year 1 and Year 2 option cash and share payments. If Tusk is able to rectifying the title issues, the deferred Year 1 and Year 2 payments will be due. During the year ended March 31, 2021, the Company issued 65% of the Year 1 share payment. The parties have temporarily postponed the remaining payments and are in discussion to amend the agreement terms.

Upon exercise of the option, the Company will be subject to a NSR on the San Javier project of 1.0% when copper prices are US\$3.50 or less per pound and 2.0% when copper prices are US\$3.51 or higher per pound. The royalty is subject to a right of first refusal in favor of the Company.

In January 2022, the Company closed and issued convertible debentures for aggregate total proceeds of \$1,750,000 ("2022 Debentures").

The 2022 Debentures bear interest at 10% per annum and mature on December 31, 2022. At the option of the lenders, the lenders can convert their debentures and any accrued interest into common shares of the Company, for a price equal to \$0.45 per share prior to maturity. In the event the convertible debentures remain outstanding at maturity, the debentures with its accrued interest will be payable, in cash or shares, at the option of the lenders, at \$0.45 per common share.

The 2022 Debentures are secured by a general security agreement over all the present and after-acquired personal property of the Company and a share pledge agreement over all of the issued and outstanding shares of the Companys wholly-owned subsidiary IC Exploration Ltd. which owns, indirectly through IC Exploration (US) Ltd., the San Antionio Property.

The 2022 Debentures are compound instruments, and the proceeds are required to be bifurcated to record the fair value of the separate debt and equity components. The fair value of the debt was determined using a discounted cash flow model using an estimated market interest rate for equivalent debt of 12%. The initial fair value of the debt was calculated to be \$1,574,187 with the residual portion of \$175,813 allocated to equity. In addition, the resulting deferred tax amount of \$47,470 has been charged to the equity component.

In June 2022, the Company issued 588,426 common shares with a fair value of \$264,792 in connection with the conversion of a portion of the 2022 Debentures at a conversion price of \$0.45 per share and paid \$8,125 interest in cash. As a result, the Company reclassified \$18,334 from the equity component of the convertible debentures to share capital.

8. GOVERNMENT LOAN PAYABLE

During the year ended March 31, 2021, the Company applied for and received from the federal government of Canada loan of \$60,000 under the Canada Emergency Business Account ("CEBA") program and the Company recorded the balance as government loan payable. If the loan is fully repaid by December 31, 2023, \$20,000 of the loan will be forgiven. If the loan is not fully repaid by December 31, 2023, the loan will incur 5% interest during the remaining term of the loan ending on December 31, 2025, the date by which the loan must be fully repaid. The Company intends to pay back the CEBA loan by December 2023.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 Inputs that are not based on observable market data.

The Company's financial instruments consist of cash, receivables, loans receivable, lease liabilities, accounts payable and accrued liabilities and convertible debentures. The fair value of these financial instruments, other than cash, approximates their carrying values due to the short-term nature of these instruments. Cash is measured at fair value using level 1 inputs. Receivables, loans receivable, lease liabilities, accounts payable and accrued liabilities and convertible debentures are measured at amortized cost.

The Company is exposed to a variety of financial risks by virtue of its activities including currency, credit, interest rate, liquidity and commodity price risk.

(Expressed in Canadian Dollars - Unaudited)

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

a) Currency risk

The Company conducts the majority of exploration and evaluation activities in the United States and Mexico. As such, it is subject to risk due to fluctuations in the exchange rates of the Canadian dollars, US dollars, and Mexican peso. As at September 30, 2022, the Company had a US foreign currency net monetary asset position of approximately US\$205,528 and a MXN Peso net monetary liabilities position of approximately MXN Peso 2,946,700. Each 10% change in the US dollar and Mexican peso relative to the Canadian dollar will result in a foreign exchange gain/loss of approximately \$28,200 and \$20,000, respectively.

b) Credit risk

Credit risk is risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's cash is held in large Canadian financial institutions and its receivables are due from the Government of Canada. As such, the Company determined that it is not exposed to significant credit risk.

c) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to limited interest rate risk as it only holds cash and highly liquid short-term investments. The Company is not exposed to interest rate risk with its lease liabilities or convertible debentures as they are not subject to floating interest rates.

d) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they come due. The Company's ability to continue as a going concern is dependent on management's ability to raise the required capital through future equity or debt issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning, and approval of significant expenditures and commitments.

e) Commodity price risk

The ability of the Company to explore and develop its exploration and evaluation assets and the future profitability of the Company are directly related to the price of copper, zinc and other base metals. The Company monitors these metal prices to determine the appropriate course of action to be taken.

13. CAPITAL MANAGEMENT

The Company considers its capital structure to consist of all components of shareholders' equity. The Company manages its capital structure and makes adjustments to it, in order to have the funds available to support the exploration of its mineral properties. The Company is an exploration stage company, as such the Company is dependent on external equity financing to fund its activities. In order to pay for administrative costs and exploration expenditures, the Company plans to raise additional amounts as needed. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the six months ended September 30, 2022. The Company is not subject to externally imposed capital requirements.

(Expressed in Canadian Dollars – Unaudited)

14. SUBSEQUENT EVENTS

- a) In October 2022, the Company closed the final tranche of a private placement financing with Teck Resources Limited of 550,000 units at a price of \$0.48 per unit for gross proceeds of \$264,000. Each unit consists of one common share of the Company and one-half share purchase warrant. Each warrant shall entitle the holder to purchase an additional common share of the Company at a price of \$0.72 for a period of three years.
- b) In October 2022, the Company extended the maturity date of the 2022 Debentures (Note 7), with a remaining principal amount of \$1,500,000, by one year until December 31, 2023 ("Debenture Extension"). The terms of the 2022 Debentures remain unchanged except for the increase of the conversion price from \$0.45 to \$0.55 per share.

Pursuant to the Debenture Extension, the Company issued 206,595 units of the Company in settlement of \$99,166 of accrued interest payable on the 2022 Debentures. Each unit consists of one common share of the Company and one-half share purchase warrant. Each warrant shall entitle the holder to purchase an additional common share of the Company at a price of \$0.72 for a period of three years.
